

# PATHWAYS

OPENING Fall 2024

## Stockton's First Large Non-Congregate Emergency Shelter

- > **A collaborative partnership between public, private and non-profit organizations to address the diverse needs of those living unsheltered.** Each individual living unsheltered has unique needs. Those with special needs or health challenges often can't utilize traditional shelters. This new shelter concept fills a critical equity gap by opening doors for hundreds of individuals whose options for shelter are often limited.
- > **Pathways removes four barriers to traditional congregate shelters:**
  - 1) Accommodates **pets**
  - 2) Welcomes **partners**
  - 3) Provides **privacy** (one-bedroom units)
  - 4) Offers security for **personal belongings**
- > **Easy access to life-changing support will help move nearly 300 people from the streets to apartments and houses.** Clients housed at Pathways will be next door to supportive services, resources, and daily necessities. A consistent support network, substance-use treatment, and individualized case management will set clients up for a successful pathway to an apartment or house, typically within six months.

"This project advances our mission to make homelessness rare, brief and non-recurring. It is a collaborative and transformational effort to address homelessness by providing the most vulnerable a safe place to stay while working to address their barriers to long-term housing."

– Petra Linden, CEO, Mary's Community Services
